RATE CALCULATIONS & COLUMN WIDTHS

HOW TO CALCULATE YOUR RATE

To work out the cost of your ad, follow the equations below.

STEP 1	You must first know the size (col/cm) of the advertisement you require. To calculate this, simply multiply the depth of your ad (in centimetres) by its width (measured in the number of columns), like so: cm x col = col/cm
STEP 2	Refer to the relevant table within this rate card to locate your rate, and multiply this by your col/cm figure, ie: col/cm x rate = cost of ad
EXAMPLE	You wish to place a colour 20x3 ad in Wednesday's edition of The New Zealand Herald, Run of Paper: 20x3 = 60 col/cm 60 x \$47.28 (the rate) = \$2,836.80 + GST

Non-monthly account holders will incur a \$5 administration fee on all advertising placed in APN New Zealand publications.
All rates included in this rate card are exclusive of GST.
