HOW TO USE THIS RATECARD

Using the Herald ratecard

The New Zealand Herald, Weekend Herald, and Herald on Sunday offer a huge variety of mass-market and targeted advertising environments for advertisers. These are listed on the next page. We recommend you speak with your account manager to establish which options best suits your business.

Once you have selected a product or range of products, position, and advertising frequency, you need to give thought to the size of your advertisement. While your account manager may recommend certain key sizes to gain placement opportunities, customers are welcome to custom-build their own insertions.

Ad sizes are generally described as their depth in centimetres, by their width according to the number of columns they occupy, eg: 20cm by 3 columns or simply '20x3'. The table below lists the actual column widths in millimetres.

Once you have established your ad size, please refer to the 'How to calculate your rate' table opposite, and consult the rate listings on the next page to establish the cost of your ad insertion(s).

Please note that loadings do apply if you require a specific page or specific placement on the page – see **'Guaranteed placements'** table overleaf for details. Several **'Special positions'** are also available, and charged at a set rate: 'lugs' which sit alongside section mastheads, and a 6x10 position on the TV listings page.

Column widths by publication

Note that Herald pages use one of two advertising grids which have different column widths. The majority of pages use a **'Display'** grid divided into 10-columns on a broadsheet page and 7 columns on a tabloid page. However, some sections such as Classifieds and Family Notices use the **'Classifieds'** grid which is divided into 11 columns on a broadsheet page, and 8 on a tabloid page. **Canvas** magazine is an exception: ads are sold as defined set page shapes – see 'Canvas rates' overleaf. In Classifieds sections, small ad listings are also purchased by line – see the separate **'Classified lineages rates'** table overleaf.

COLUMNS	1	2	3	4	5	6	7	8	9	10	11
Broadsheet Display (10-col)	36	74	112	150	188	226	264	302	340	379	
Broadsheet Classifieds (11-col)	33.5	68	103	137.5	172	206.5	241	275.5	310	345	379.5
Tabloid Display (7-col)	36	74	112	150	188	226	264				
Tabloid Classifieds (8-col)	33.5	68	103	137.5	172	206.5	241	275.5			

In some sections, production processes may cause the original size to vary slightly but advertisements will be charged at original size. For standard advertising sizes please see Mechanical Specifications on soldonapn.co.nz

How to calculate your rate

To work out the cost of your ad, follow the steps below.

STEP 1	You must first know the size (col/cm) of the advertisement you require. To calculate this, simply multiply the depth of your ad (in centimetres) by its width (measured in the number of columns), eg: 20cm x 3 col = 60 col/cm
STEP 2	Refer to the relevant product within this rate card to locate your rate, and multiply this by your col/cm figure, for example if you wish to place a 20x3 ad in Wednesday's edition of The New Zealand Herald, run of paper: 60 col/cm x \$48.46 (the rate) = \$2,907.60

All rates included in this rate card are exclusive of GST.

Volume discounts
